

NIKHIL PANDEY

Delhi, India | nikhilpandey4000@gmail.com | +91 9871318546 | [\[Portfolio\]](#) | [\[LinkedIn\]](#) | [\[Github\]](#)

Motivated and tech-driven fresher with hands-on project experience in AI-powered chatbots, BI analytics, OCR, and machine learning systems. Proficient in Machine Learning, Deep Learning, Natural Language Processing, Generative AI, and Software Development. Eager to leverage cutting-edge technologies to build intelligent, scalable, and user-centric data-driven solutions. Known for being a fast learner, effective collaborator, and strong problem-solver with a deep passion for innovation, real-world applications, and continuous learning in the rapidly evolving field of artificial intelligence.

Education

BTECH (AI&DS)	2022-2026	Dr. Akhilesh Das Gupta Institute of Professional Studies	CGPA 8.86*
CLASS 12 th	2020-2021	Kendriya Vidyalaya CRPF	86 %
CLASS 10 th	2018-2019	Kendriya Vidyalaya CRPF	75 %

Professional Experience

MRIKAL	Data Scientist Intern	Jan 2026 - Present
- Designed and developed an AI-powered chatbot for Apache Superset and Preset dashboards enabling natural language querying. - Achieved 90% accuracy on simple dashboards and 82% accuracy on complex dashboards through chatbot performance and evaluation. - Implemented dynamic SQL query generation from user inputs, enabling efficient and real-time data retrieval from dashboard systems. - Developed an LLM-based intent classification system to accurately route queries between informational, and data extraction tasks.		
INVISIBLE TECHNOLOGIES	ML Engineer Specialist – AI Trainer	Oct 2025 – Dec 2025
- Evaluated and solved 90+ problem statements for Meta’s MLEng project. - Assessed Plan A vs. Plan B for each workflow task and selected the most feasible, novel, and implementation-ready solution. - Analyzed constraints, edge cases, and expected outputs to ensure high-quality reasoning and consistent decision accuracy.		
WESEE (Indian Navy) [Link]	Data Scientist Intern	July 2025 – Sep 2025
- Developed an object detection system using YOLOv11n to identify foreign aircraft, submarines, and ships achieving 87% accuracy - Built offline OCR RAG system using LLM and Doctr to extract text from PDFs with 94% accuracy - Implemented RAG pipeline combining similarity search and Mistral-7B for document-grounded question answering improving response time by 40%		
MESHLINTECH [Link]	Robotic Intern	April 2025 – July 2025
- Designed a garland-making machine sketch from scratch using Fusion 360 and Blender for detailed 3D modelling and simulation. - Optimized the Knot-making mechanism design by refining its components, boosting overall efficiency and performance by 25%. - Improved overall machine automation by 40%, reducing human effort in knot tying and enhancing the system’s operational efficiency.		
ACADOSE [Link]	Machine Learning Intern	June 2024 – Dec 2024
- Worked on a Price Analysis project to enhance pricing accuracy and increase overall operational efficiency of algorithm by 15%. - Improved data quality, visualized patterns using Matplotlib and Seaborn, and applied DBSCAN algorithm to generate data clusters. - Enhanced overall efficiency by 15% and enabled easy assignment of desired clusters to new data points using DBSCAN algorithm.		

Academic Projects

INTERVIEW KING [GitHub]
- Built full-stack Interview King platform integrating OCR, embeddings, and intelligent agent for automated resume analysis. - Developed React-based interface for resume uploads, ATS visualization, real-time interaction with interview preparation agent. - Designed LangGraph-driven AI agent generating questions, evaluating answers, and providing structured actionable feedback.

Technical Skills

- Programming Languages:** Python, C++, C.
- Data Analytics:** Excel, Power BI, Microsoft Power Point, Apache Superset, Preset
- Data Science:** Machine learning, Deep learning, NLP, Generative AI, RAG, Agentic AI.
- API:** Fast API.
- Database:** MySQL, Postgres
- Core Subjects:** OOPs, Data Structures, DBMS.
- Robotics:** Fusion360, Blender.

Publication

- Research Publication — IJEDR (2025)** [\[Link\]](#)
Offline Document Understanding: A Study of OCR, LLMs, and Semantic Retrieval
Co-authors: P. Sinha, R. Kumar
Impact Factor: 9.37 | Paper ID: IJEDR2504311

Achievement (Co-curricular)

- Grand Finalist at IIT Ropar Predictathon – Achieved 95%+ accuracy in an image classification model.
- Solved 400+ coding questions on Code Chef and LeetCode, strengthening problem-solving skills [\[Codechef\]](#) | [\[LeetCode\]](#)
- Secured 7th rank in the entire class during 3rd semester with an SGPA of 9.22.

Extra-Curricular Activities

- Represented GGSIPU in the North Zone Inter University Kabaddi Tournament held in November 2024.
- Secured 1st place in February 2025 and 2nd place in February 2024 out of 20+ teams at the ADGITM Inter Kabaddi Tournament.
- Secured 3rd place in the 17th All India GGSIPU Badminton Tournament held in December 2022.
